Activity Overview

The course was developed by the American College of Clinical Pharmacy (ACCP) and the American Society of Health-System Pharmacists (ASHP) to help cardiology pharmacy practitioners prepare for the Board of Pharmacy Specialties (BPS) Cardiology Pharmacy Specialty Certification examination and obtain a broad and detailed update to their knowledge of ambulatory care. The course content is based on the domains and knowledge areas tested on the examination. The detailed workbook, filled with patient cases and practice-based self-assessment questions, is an excellent resource for assessing knowledge in several areas of ambulatory care practice.

This course workbook is **NOT** intended for those obtaining recertification credit. To earn recertification credit, please purchase the full recertification course here: <http://elearning.ashp.org/catalog/Cards-recert>

System Technical Requirements

This workbook is delivered via your Web browser and Acrobat PDF. You should have a basic comfort level using a computer and navigating web sites.

View the [minimum technical and system requirements](#) for learning activities.

Development

ACCP and ASHP collaborate on cardiology pharmacy activities.

To maintain its strict, independent standards for certification, BPS does NOT endorse or provide review information, preparatory courses, or study guides for Board Certification Examinations.
