Activity Overview

The course was developed by the American College of Clinical Pharmacy (ACCP) and the American Society of Health-System Pharmacists (ASHP) to help cardiology pharmacy practitioners prepare for the Board of Pharmacy Specialties (BPS) Cardiology Pharmacy Specialty Certification examination and obtain a broad and detailed update to their knowledge of cardiology. The course content is based on the domains and knowledge areas tested on the examination. The detailed workbook, filled with patient cases and practice-based self-assessment questions, is an excellent resource for assessing knowledge in several areas of ambulatory care practice.

This course workbook is **NOT** intended for those obtaining recertification credit. To earn recertification credit, please purchase the full recertification course here: <http://elearning.ashp.org/catalog/cards-recert>

System Technical Requirements
